

Join us for a new session of Kidvets this Fall! (Grades 2-6)

Learn how veterinarians do their job and how they help their animal patients! Students adopt their own (stuffed) animal and use their science, math, and critical thinking skills to learn about responsible pet ownership, how animal bodies work, signs of illness, and all the other fun, gross, weird and amazing things veterinarians encounter while doing their jobs.

Topics vary each session. This session we will explore: dog behavior, safe animal interactions, animal emergencies, pet overpopulation, the nervous system and rabies, Halloween dangers for pets, and more!

Hands-on demonstrations, class problem-solving, scientific models and brief educational videos highlight new topics each trimester. Live animal guests will accompany Dr Pam to help students practice what they have learned!

Dr. Pam Wittenberg has over 25 years of experience in the field of veterinary medicine. When she's not teaching kids about animals and science, she works as a veterinarian at VetPronto in the East Bay and San Francisco, and teaches Veterinary Technology classes at Santa Rosa Junior College. For more information visit kidvets.net, email pamwittenberg@kidvets.net, or find us on Facebook!

Mondays, 2:30-3:30
Sept 11,18,25 Oct 9,16,23
Room 28
